DISTINCTIONS

- 1st Place, UFP Exam, 2022.**
Top-ranked admission candidate across biology, English and motivation interview.
- 1st in Class, EFMA, 2019.**
Valedictorian in business management, marketing and human resources.
- Pan-European CAD-CAM Trainer.**
Supported 30+ laboratories in their transition from traditional to digital workflows.

INTERESTS

Editorial design · Clinical writing · Photography · Perfumery

12+

YEARS IN DENTAL DESIGN

50+

LABORATORIES ACROSS EUROPE

30+

TEAMS TRAINED IN CAD/CAM

THE WORK

Dental Designer · Freelance

Jan 2023 · Present

HPF Dental Design · Porto, Portugal

- Design full-arch aesthetic restorations and complex prosthetic cases for international laboratories.
- Train dental students and partner laboratories in CAD/CAM workflows.
- Develop end-to-end digital workflows, from intraoral scan to final prosthesis.

Founder & Lead Dental Designer

Oct 2019 · Aug 2022

FUSAROCORP · France

- Designed digital prosthetic restorations for 50+ dental laboratories across Europe.
- Trained 30+ laboratory teams on Exocad and CAD/CAM workflows, supporting their digital transition.
- Produced aesthetic simulations and virtual smile previews used by clinicians to validate cases before fabrication.

Head of CAD Department

Sep 2016 · Aug 2019

FUSARO JPH Laboratory · France

- Headed the laboratory's CAD department: digital design, supervision of junior technicians, coordination with European milling centres.
- Developed and launched the laboratory's first full-zirconia crown product line.

Apprentice Dental Technician

Sep 2015 · Aug 2016

FUSARO JPH Laboratory · France

- Trained in traditional laboratory techniques (waxing, ceramic layering, casting) and introductory digital workflows.

THE PATH

Master of Dental Medicine · Fernando Pessoa University, Porto

2022 · Present

Entrepreneurship Degree · EFMA, Bourgoin-Jallieu

2017 · 2019

Professional Baccalaureate · SEPR, Lyon

2015 · 2017

IN PROGRESS

Digital Esthetic Dentistry: between optimization and personalization

Master's thesis, in progress (UFP, Porto). Investigates the trade-off between standardized digital workflows (DSD, virtual try-in, full-arch protocols) and case-by-case clinical adaptation in esthetic restorative outcomes.
